

## 兔抗 METTL7A 多克隆抗体

中文名称：兔抗 METTL7A 多克隆抗体

英文名称：Anti-METTL7A rabbit polyclonal antibody

别名：AAM-B

储存：冷冻（-20℃）

抗原：METTL7A

宿主：Rabbit

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

相关类别：一抗

### 技术规格

**Background:**

METTL7A (methyltransferase like 7A), also known as AAM-B, is a 244 amino acid protein that is thought to function as a methyltransferase and is encoded by a gene which maps to chromosome 12. Encoding over 1,100 genes, chromosome 12 comprises nearly 4.5% of the human genome and is associated with a number of skeletal deformities, including hypochondrogenesis, achondrogenesis and Kniest dysplasia. Chromosome 12 is also home to both a homeobox gene cluster which encodes crucial transcription factors for morphogenesis, and a natural killer complex gene cluster encoding C-type lectin proteins which mediate the NK cell response to MHC I interaction. Additionally, Trisomy 12p (three copies of the p arm of chrom

	osome 12) leads to facial developmental defects, seizure disorders and a host of other symptoms varying in severity depending on the extent of mosaicism.
<b>Applications:</b>	ELISA, IHC
<b>Name of antibody:</b>	METTL7A
<b>Immunogen:</b>	Fusion protein of human METTL7A
<b>Full name:</b>	methyltransferase like 7A
<b>Synonyms:</b>	AAM-B
<b>SwissProt:</b>	Q9H8H3
<b>ELISA Recommended dilution:</b>	5000-10000
<b>IHC positive control:</b>	Human brain and human prostate cancer
<b>IHC Recommend dilution:</b>	30-150
