

兔抗 CDCA4 多克隆抗体

中文名称：兔抗 CDCA4 多克隆抗体

英文名称：Anti-CDCA4 rabbit polyclonal antibody

别名：cell division cycle associated 4; HEPP; SEI-3/HEPP

相关类别：一抗

储存：冷冻（-20℃）

宿主：Rabbit

抗原：CDCA4

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a protein that belongs to the E2F family of transcription factors. This protein regulates E2F-dependent transcriptional activation and cell proliferation, mainly through the E2F/retinoblastoma protein pathway. It also functions in the regulation of JUN oncogene expression. This protein shows distinctive nuclear-mitotic apparatus distribution, it is involved in spindle organization from prometaphase, and may also play a role as a midzone factor involved in chromosome segregation or cytokinesis. Two alternatively spliced transcript variants encoding the same protein have been noted for this gene. Two pseudogenes ha

	ve also been identified on chromosome 1.
Applications:	ELISA, IHC
Name of antibody:	CDCA4
Immunogen:	Full length fusion protein
Full name:	cell division cycle associated 4
Synonyms:	HEPP; SEI-3/HEPP
SwissProt:	Q9BXL8
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human esophagus cancer
IHC Recommend dilution:	25-100
