

兔抗 CYP26B1 多克隆抗体

- 中文名称：兔抗 CYP26B1 多克隆抗体
- 英文名称：Anti-CYP26B1 rabbit polyclonal antibody
- 别名：cytochrome P450 family 26 subfamily B member 1 RHFA; CYP26A2; P450RAI2; P450RAI-2
- 储存：冷冻（-20℃）
- 抗原：CYP26B1
- 宿主：Rabbit
- 反应种属：Human, Mouse, Rat
- 相关类别：一抗
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

Background:

This gene encodes a member of the cytochrome P450 superfamily. The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and other lipids. The encoded protein is localized to the endoplasmic reticulum, and functions as a critical regulator of all-trans retinoic acid levels by the specific inactivation of all-trans retinoic acid to hydroxylated forms. Mutations in this gene are associated with radiohumeral fusions and other skeletal and craniofacial anomalies, and increased levels of the encoded protein are associated with athe

	rosclerotic lesions. Alternative splicing results in multiple transcript variants.
Applications:	ELISA, IHC
Name of antibody:	CYP26B1
Immunogen:	Fusion protein of human CYP26B1
Full name:	cytochrome P450 family 26 subfamily B member 1
Synonyms:	RHFCA; CYP26A2; P450RAI2; P450RAI-2
SwissProt:	Q9NR63
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human brain
IHC Recommend dilution:	20-100
